E-mail: Kelley.Lear@Redmoonsolutions.com

Our company's single product, ARMS Enterprise Risk Management System™, is an integrated comprehensive PC based system for the calculation of all information, including reserves, needed to conform to state regulations, FASB Statements of Standards and federal laws. Capabilities include calculations for all life and health products on a statutory, tax and GAAP reporting basis including compliance with SOP 03-1. Principles Based Reserves, RBC and ALM calculations are included. Other capabilities include checking compliance with 7702/7702A and experience studies for mortality, lapses, expenses and policyholder behavior. All calculations use stochastic methodology and policyholder behavior where required. The system can be used by any company but is designed for companies adopting or intending to adopt Enterprise Risk Management.

Contact: Joe Soga
E-mail: js@ggyaxis.com

AXIS is different—an integrated software package for Pricing, Projection and Valuation of Life, Disability, Annuity and Living Benefits Products. AXIS applications include ALM; Surplus, Stochastic and Cash Flow Testing; Earnings Analysis. AXIS is extremely fast, flexible and easy to use.

Why should you consider AXIS?

- Focus on software not consulting so we build a better system. Just ask our 1300+ users.
- Integrated. One system for all your needs.
- Use is right out of the box. Your actuaries concentrate on actuarial work, not software development.
- Speed. You can use seriatim processing for everything, not just valuation.
- Stochastic Processing, Distributed Processing, and Grid available.
- Best Service.

Contact: Gary Busse & Bob Keating
E-mail: gbusse@polysystems.com,
bkeating@polysystems.com

PolySystems is a leading international provider of valuation, financial analysis and risk management software. PC based systems compute reserves for all traditional life, universal life, annuities and health products. PolySystems' software supports embedded value calculations, SOP 03-1, RBC C-3 Phase 2 (including the standard scenario) and AG38.

PolySystems offers analytics and modeling. Modules for experience studies, source of earning analysis, variance analysis and projections (including new business modeling) are available.

For cash flow testing and asset liability management work, PolySystems' Asset Delphi System integrates the liability processing with capabilities that reflect actual assets and economic scenarios analysis. It supports deterministic scenarios and stochastic processing. All valuation and projection systems run on PolySystems Grid Processing Systems.
